Los Angeles, California (April 2, 2008) – Valued Professional Products Ltd. announces the exclusive distribution of products from Kem Medical of Farmingdale, New York. Specializing in workplace safety, Kem Medical teams with Valued to highlight the importance of safe chemical handling products and quality assurance programs to the Canadian market.

Kem Medical has been manufacturing and distributing safety handling and monitoring devices for healthcare for over 20 years. The devices available allow employers to monitor and set quality assurance programs to prevent exposed chemicals and include spill response kits, neutralizing and fume elimination products.

As Canadian healthcare continues to recognize need for proactive standards of safety in healthcare, we see the ability to offer these products to the market as a leading opportunity for all facilities across Canada.
